

3DEXPERIENCE Training

Generative Shape Design Essentials

Course Length: 3 days

This course will teach you how to use the Generative Shape Design app to create curves and surfaces. Learn how to assemble, re-limit, and connect the geometries smoothly. You will also learn how to analyze the wireframe and the surface quality and rectify the detected defects.

Course Topics:

- Create curves and improve the quality of the imported wireframes
- Create surfaces based on the wireframe geometries
- Assemble, re-limit and connect the surfaces smoothly to achieve the topology
- Analyze the surface quality and heal the defects

Prerequisites: Familiarity with the Mechanical Design Fundamentals.

Learn Where It's Convenient for You

Attend Classes:

- Online with an instructor
- At one of our training centers
- At your on-site training facility
- At a location of your choice (via our mobile training labs)
