

Creo Parametric 7.0 Training

Advanced Part Design

Course Length: 3 days

As an experienced user in the basics of Creo Parametric, this training course enables you to become more productive by extending your modeling abilities with advanced functionality and techniques. This extensive hands-on training course contains numerous labs and practices to give you practical experience that will improve your job performance.

Course Topics:

- Advanced datum features
- Advanced bends
- Sweeps with variable sections and helical sweeps
- Rotational and swept blends
- Designing with rounds
- Advanced round functionality
- Drafts
- Basic surface design
- Part family tables
- User-defined features (UDFs)
- Data sharing
- Multibody master model technique
- View Manager
- Automation (appendix)

Prerequisites: Creo Parametric: Introduction to Solid Modeling or equivalent Creo Parametric experience

On-Site Training

Rand 3D offers its Creo Parametric classes at your preferred location. You provide the site and software, and we'll take care of the rest!

In addition to the expertise you'll receive from our instructors, attendees will receive a copy of the learning guide to keep for future reference, and a Certificate of Completion.

For class pricing, please contact your Education Sales Representative.
